```java
1
2 /**
3  * Defines a generic object that a bag can hold. This will
4  * remove the limitation that the bag can only hold Strings.
5  *
6  * @author Chris Fernandes
7  * @version 4/29/12
8  */
9 package proj5;
10 public interface Containable
11 {
12     // need a way to define equality between Containables
13     // for things like finding a Containable in a Bag
14     // Note that this overrides the equals method in the Object class
15     public boolean equals(Object otherContainable);
16
17     // converts a Containable object to a printable string
18     public String toString();
19 }
20
```
